

1ST PROJECT

Four young males smashing drums and sweating out a live show that demands attention!

By using only drums to create what can be best described as 'Aggressive Percussion!', 1st Project has truly made their mark on the entertainment industry, and over the past eleven years, have continued to captivate audiences with their unique musical style, passion and vigor...

History

1st Project started in 1999, at a music school in Johannesburg. The group's mission was to change the common view of drumming groups as being "a bunch of hippies" banging drums around a fire, by creating the percussive spectacular which has become a household name in the South African music industry.

Since then they have played over 1500 shows, toured over 20 countries, and been featured in hundreds of media spots worldwide, marking them as South Africa's biggest drumming act.

1st Project boast being the only drumming act to receive 2 South African Music Award nominations; win a World Music Award in China, as well as the first South African band to have a full one hour music special on MNET and across DSTV South Africa, Africa and Asia.

PLAY IT TO BREAK IT!
